**THE FIRST PRODUCTIVITY APPLICATION TO TRACK ALL OF YOUR BILLABLE PHONE TIME... NO MATTER THE DEVICE YOU'RE USING!**

**SAY GOODBYE TO LOST BILLABLE TIME.**

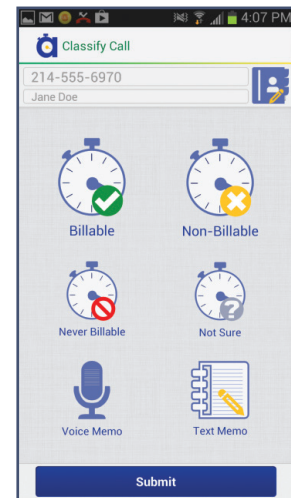

Whether using a smartphone or a tablet, you retain the ability to keep tabs on all of your billable phone calls. Users are prompted to classify each call and can create detailed audio or text notes, making billing reconciliation easy and simple. With *Ability*, you'll never lose track of your billable calls again!

It can be a challenge to track billable hours, especially time spent on your office phone. Sticky notes and scraps of paper take hours to reconcile, while manual timers work only if you remember to start them. It's been estimated that lawyers lose at least five billable hours each month on untracked calls and billing reconciliation. For an office of four, that can add up to \$5,000 or more of lost revenue every month!

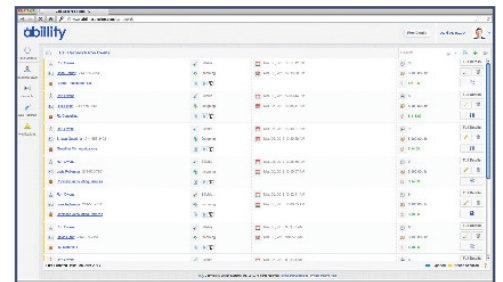

Now there is *Ability*.™ It tracks all of your billable phone time, no matter what type of device you're using.

- Quickly capture every call every time on every device, including mobile and desktop phones.
- Simplify billing reconciliation by creating an audio or text reminder about each call.
- Access, review, modify and export your call records in real-time from the cloud.
